

E-2100ZC Recycled

The First 100% Recycled Window Film with Clean-Room Clarity

LINTEC of America introduces ECO-2100ZC Recycled, the industry's first optically clear, scratch-resistant window film made from 100% post-consumer recycled PET. Designed for UV inkjet printing, this durable 2 mil polyester film delivers pristine clarity for digital window graphics.

Why ECO-2100ZC Recycled?

100% Recycled PET Content

Print layer is crafted entirely from post-consumer water bottles for true waste reduction.

Scratch-Resistant Coating

Engineered for durability in high-traffic commercial and architectural environments.

Optically Clear Finish

Displays vibrant prints while maintaining glass-like transparency.

UV Inkjet Compatible

Pairs seamlessly with modern UV inkjet technologies for vivid, large-format designs.

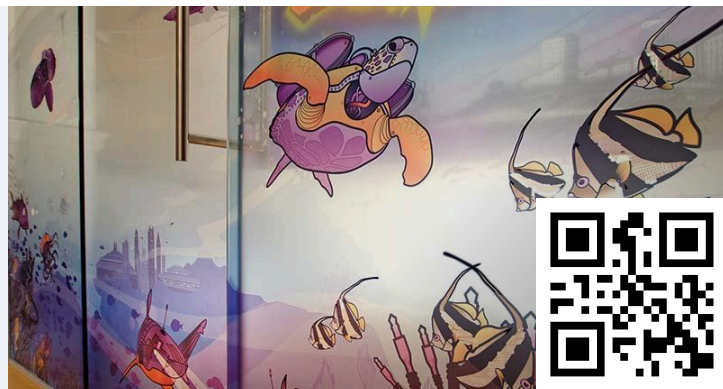

LEED-Friendly

Contributes to green building credits and sustainability goals.

Ideal For

Retail window graphics, architectural installations, commercial interior branding, glass displays, and any high-clarity large-format print application.

Roll Sizes

54" x 150' and 61" x 150'

2 mil | Permanent Adhesive | PET Liner

From Bottle to Bold Design

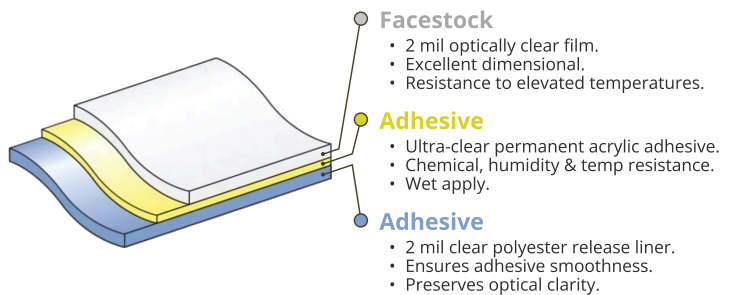

The Circular Story Behind ECO-2100ZC Recycled

Each roll of ECO-2100ZC Recycled begins as discarded plastic bottles. Through precision clean-room processing, LINTEC transforms post-consumer PET into a high-performance printable. This is sustainability you can see in stunning window graphics!

- Over 50 billion PET bottles produced globally each year
- Recycling 1 ton of PET saves 7.4 cubic yards of landfill space
- Our process closes the loop: waste becomes design

Pair with Performance

Print Stunning, Sustainable Graphics with UV Inkjet Technology

ECO-2100ZC Recycled is fully optimized for UV inkjet printing. Achieve crisp lines, brilliant color, and strong adhesion all with zero PVC and reduced environmental footprint.

Use it to print

- Storefront visuals
- Office branding
- Translucent promotional films
- Temporary and permanent displays
